## HENSEL INTRA LED LAMP OFFERS ENORMOUS POSSIBILITIES

Hensel offers a new, versatile solution for those who need continuous light or prefer it to flash.

LED light sources are becoming more and more popular. However, they often only offer limited possibilities for changing the light quality. LED panels, LED spots, or LED lamps without changeable reflectors are very limited regarding the change of light quality. Users need several different devices which means a higher investment and more transport.

Hensel has developed the new Intra LED lamp as a practical alternative. The 50 W High Power LED offers daylight temperature, a high CRI of 92, and is equally well suited for video and photo applications. The stepless power control ranges from 10% to 100%.

The Intra LED can be combined with the complete range of Hensel reflectors, softboxes, honeycombs, and umbrellas. From accentuated spotlight to homogeneous area lighting, everything is possible. Reflectors can be turned 360° and changed in a matter of seconds. A small, light and affordable device with huge potential. Just see for yourself!

INTRA LED	
Code No.	8710
Lamp	50 W High Power LED
Level of illumination	3600 lx / 335 fc (9" reflector at 1m) 1700 lx / 158 fc (60x60 cm softbox at 1m)
CRI	92
Color temperature	5000° K
Power setting	10%-100%
Reflector connector	Hensel EH (10 cm)
Voltage	100-240V/50 & 60 Hz
Size	260 x 210 x 140 mm (L x H x W)
Weight	1.45 kg
Scope of Delivery:	With integrated tilt/stand adapter, glass protection dome, transport cap and umbrella holder
